

## **Approaching AI in Teaching and Learning**

It's finally the long-awaited summer; academicians can finally catch up on their course revisions and writing projects long in the planning. We hope you are having a productive start to yours. Abstract deadlines for several forensic meetings are fast approaching. COFSE is planning a workshop on AI and education at the national AAFS meeting in February. Reach out to the editors or COFSE leaders if you want to get involved or details to attend. If you are using AI in your courses and have created an innovative assignment or project using the tool, we welcome your paper in the *Journal*. Of course, we welcome papers on all of the traditional forensic education topics as well. We have several interesting commentaries and papers in the current issue. Happy reading and happy writing!
