

Seeking Lab Experiments for General Forensic Science Courses

We want to thank our authors and contributors for sharing their experiences teaching forensic science during a global pandemic and continuing to write articles of interest to forensic educators. The *Journal* has had interesting and diverse contributions since its inception. There remains much interest in lab experiments and activities for general forensic science courses. As teachers, faculty, and professional educators, we invite you to share your ideas, classroom activities and lab experiments that work. At the *Journal of Forensic Science Education*, we are dedicated to being the forum for publishing forensic lab experiments and classroom activities. If you are doing active learning, experiential learning, and service-learning activities with your students, we are looking for these submissions from you. All submissions will undergo peer review.

Kelly M. Elkins, Ph.D.
Lawrence Quarino, Ph.D., GKE-ABC
Adrienne Brundage, Ph.D.
